Professional Summary

Results-driven Full Stack Developer with experience building and deploying production-grade web and mobile applications. Proficient in Java, Python, JavaScript, Flutter, Spring Boot, Django, and RESTful APIs. Skilled in cloud deployment, mobile app publishing, payment gateway integration, and cross-functional team collaboration with a focus on performance and scalability.

Education

Sethu Institute of Technology

Bachelor of Engineering in Computer Science and Design

2022 – 2026

CGPA: 7.8/10

Experience

Cloudrule Technologies Private Limited

March 2026 – Present

Full Stack Developer Intern

Madurai, India

- Developed and deployed the complete RoyalFishShop mobile application (Admin & User apps) using Flutter, Django REST Framework, and MySQL.
- Built scalable Flutter frontend architecture using Provider state management, REST API integration, JSON serialization, and structured project workflow.
- Implemented Firebase Cloud Messaging (FCM) for push notifications, 4-digit OTP authentication, and Razorpay payment gateway in production applications.
- Conducted API testing, widget testing, and unit testing; optimized performance and resolved UI and API-related issues to improve application stability.
- Deployed Django backend on Hostinger VPS and published Flutter apps to the Google Play Store.

Techpuram Technology Private Limited

November 2024 – February 2025

Full Stack Developer Intern

Madurai, India

- Developed a SaaS CRM product using Spring Boot (backend), Svelte 5 (frontend), and PostgreSQL for database management.
- Designed and implemented SMTP-based email sending with Spring Boot; tested and validated all API endpoints using Postman.
- Built an IMAP-based email receiving service and managed incoming email storage efficiently in PostgreSQL using entity and repository design patterns.
- Created reusable bulk email templates and a Gmail-like compose UI with to, cc, bcc, subject, and rich text formatting using Svelte 5.
- Configured secure CORS policies to enable seamless and safe cross-origin communication across the full-stack application.

Projects

Smart Service Booking Platform | *Spring Boot, React.js, MongoDB, RESTful API*

May 2024 – June 2024

- Developed a full-stack web application with secure JWT-based authentication, role-based access control, and payment gateway integration.
- Optimized RESTful API architecture with efficient MongoDB query design, improving database query performance by 50%.
- Built interactive dashboards for service providers and users, resulting in a 35% increase in user retention.
- Integrated a secure payment gateway, improving transaction reliability and customer satisfaction by 40%.

Technical Skills

Programming Languages: Java, Python, JavaScript, TypeScript, Dart, SQL

Mobile Development: Flutter, Provider State Management, Firebase Cloud Messaging (FCM), Google Play Store Deployment

Frontend Technologies: React.js, HTML5, CSS3, Tailwind CSS, Svelte 5

Backend Technologies: Spring Boot, Django, Node.js, Express.js, FastAPI, RESTful APIs, SMTP, IMAP

Databases: PostgreSQL, MongoDB, MySQL, Firebase Firestore

Cloud & DevOps: AWS, Hostinger VPS, Git, GitHub, Google Play Store

Integrations & Tools: Razorpay Payment Gateway, OTP Authentication, Postman, VS Code, Eclipse, Maven, npm

Certifications & Achievements

- Java Programming – NPTEL Certified; Introduction to Internet of Things – NPTEL Certified
- Won 2nd and 3rd prizes in technical paper and project presentations (fire engine robot, EV power management)
